FEDERDAY, OCTOBER 21, 1806 REPUBLICAN NOMINATIONS. For Proddent:

WILLIAM MCKINLEY, Of Ohio.

For Vice President GARRET A. HOBART, Of New Jersey.

FOR PRESIDENTIAL ELECTORS. For Electors at Large

Blaine in 1891.

Candidate Bryan with a disregard for bonesty that stamps him as an unfit man for any position of trust, has been rushog over the country delivering speeches at a fixed charge of \$10 a minute claiming among other things that the late James G. Blaine was an advocate of free silver. As a basis for this inexcusably Islae charge, he quotes a garbled extract from one of Mr. Blaine's speeches in Congress, the full text of which has been circulated by the Republicans as a sound money document, so that this particular lie has proved one of the many omerange launched by the silverites in this campaign. Here is a letter written by Mr. Blaine in 1891.

the doubtful column. States which the Bryan managers claim with the most unbushing confidence, that will undoubtlish part in the Onio compaign this year for many reasons, which I need not give. But I hope that no effort will be spared to elect McKinley. His victory at this time is very important to the country and to the Republican party. Ha and Mr. Campbell represent the honest difference between the two parties at this time. There is no dodging and no existent. The election of McKinley means the policy of protection and honest money. The election of Campbell means the policy of protection and honest money. The election of the currency. I believe Ohio will stand by McKinley. Very sincerely yours.

Link III Smyth ex-United States Minster to Liberia and editor of an influential colored paper, the Reformer, brought good news from the Old Dominston, and the victor need not be decived. The election of McKinley means the policy of protection and honest money. The believe on the currency. I believe Ohio will stand by McKinley. Very sincerely yours.

LAMES G. BLAINE. Ey. It Delieve Onlo will stand by me-binley. Very sincerely yours. JAMES G. BLAINE.

In that year as in the present, cam-paign McKinley was the champion of protection and sound money. Campbell tion, but it will not be found in the colomns of a silver paper, neither wil it be quoted by Bryan. Those papers and their candidates are desperately resorting to misrepresentation, but they carnot deceive the American people. The and they will do in 1896 just what Mr. everyone knows, and for that reason bundreds of them never bothered to go in 1891-vote for protection and horest to the polls.

Labor Vote for McKinley. The Commercial is evidently over-whelmed by the political indications and fore, what is for their interest. The Commercial cannot name a laboring man in this country who complates because bis dollar buys too much, and yer that is

exactly the contention of the silverites. On the other hand it can hear laboring mea complain everywhere at the general Mechanics stagnation of business, a stagnation to which Bryan contributed as a osciber of the Ways and Means Committee that tinkered the tariff and placed lumber on the free list in spite of the protest of the proprietor of the Commercial. The laboring men would be the greatest sufferers should the free silver party secure control of the Government. Of all the voters in the country the laborers are the men who should set their face agains. the eliver craze. They know it and that is why they are flocking to the McKinley column. When the Commercial talk about intimidation and coercion it

insults their intelligence. As a matter of fact so much has been said on this point that a correspondent of the Boston Herald has been investigating the labor vote in Chicago. The Popocratic candidate has frequently declared that "a Bryan heart throbbed beneath many a McKinley campaign button." This is like good many of the statements made by the same individual -without foundation. For some days the Herald correspondent has been associated with the laborers of Chicago and has applied tests that are absolutely reliable. He has talked with them in the shop, in their homes and has heard them discuss the campaign teaues among themselves. As a restrict his work this writer states that there is no truth in the claim that the wage carpers are being coerced. The labor vote is for Mckinley because his election means a restoration of business confidence and that means prosperity for labor. The Commercial may as well reconcile Itself to the inevitable. Bryanism is sure to go down in defeat on the third of November.

Significant Frankness.

The Colorado Mining Industry and Review makes a frank admission that will be especially interesting to the wage earners. Speaking to the manufacturers it warned them that the advantage held by the countries that pay their wages in allver can only be met by placing America on a silver basis. That i fifty cent dollar so that we can compete w th the underpaid labor of the free silver countries. This places the burden exactly where it is bound to fall if Bry. an is successful, samely, on labor. The wage carners should remember this fact and vote accordingly.

Election Figures. The New York correspondent of the elphia Press writes. If any misguiled follower of Bryan and Sewall. he that the claims put forth by the Maticual Committee through Chairman Hanna and Senator Quay are Se bieffing purposes the sooner he dis-fer bieffing purposes the sooner he dis-mines ha mind of the life. The quicker wid he to also as appreciate his truly po-alliant. The has to that the compagn And Plant Wheel Park

until on Saturday, Chairman Hanna deeided to announce the estimated Republican strength by States up to that time. The list, as first figured by Senator Quay, is generally understood to be as

The announcement of Chairman

Hanna's list of Republican States adds to the above the following: North Dakota 3 Washington. Kaneae 10 Oregon...... .. 3 .. 9 Total

This, it will be seen, includes the Pa-cific Coast States, which, until three weeks ago, were considered doubtful, The confidence in the outcome, as man-

ifested in the willingness at this time, two weeks before election, to go into the detail of States and electoral votes, is For \$6 a Year, or Only 50 not of sudden growth. The fact is that evidence has been accumulating for the past month that all of the States above-named, with the exception of the Pacific Slope States and the others, making in all thirty-three votes, added to the list of 270, were likely to go for Mc-Kinley. But it was not deemed best to make public the information in the possession of the members of the National Committee. It was too early in the campaign. Besides nothing was to be gained by it then.

Now that exact information is in the committee's hands, and the close of the campaign is just two weeks off, the com mittee's statement is published. The returns from the Pacific States were at first slow and unsatisfactory, but the latest authentic statements regarding popular feeling out there, give these States, beyond doubt, to McKinley. In every way, the above list can be regarded as conservative. There are States in the doubtful column, States which the Bryan managers claim with the most un-

information is based on reliable reports from all parts of the State, that at least 15,000 will vote with us for McKinley. Of that Greatest of all News Agencie When you consider that at the last Conprotection and sound money. that the State will go for McKinley. "But it all depends, as I have said, whether the colored vote will be counted. If it is I believe the State will go Republican by 10,000, and that is a conservapeople know what Mr. Blaine stood for tive estimate. The Republican vote has and they know what Bryan stands for not been counted in previous years, as

"This year, with the backing of the cound money Democrats, who have given assurances that this colored vote will be Earliest and Most Reliable counted, the people of our race expect to vote, and, of course, will vote for Me Kinley.
